Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 21 May 2009.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-25 is/are pending in the application.

DETAILED ACTION

1. Applicants' arguments, filed May 21, 2009, have been fully considered and they are deemed to be persuasive. However, upon reconsideration of the claims, the following rejection is necessary. They constitute the complete set presently being applied to the instant application.

Claims 1-18, 22, 24, and 25 are allowable. The restriction requirement among groups, as set forth in the Office action mailed on May 15, 2002, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.** Claim 21, directed to a computer-based system no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim. However, claims 18-20, directed to amino acid and nucleic acid sequences are withdrawn from consideration because they do not require all the limitations of an allowable claim.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

Status of the Claims

Claims 1-18 and 21-25 are under examination.

Claims 19-20 are withdrawn.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 21 and 23 rejected under 35 U.S.C. 103(a) as being unpatentable over Dahiyat et al. (Protein Science (1996) Volume 5, pages 895-903).

The instant claims are drawn to a system with the intended use of performing claim 1. The system includes an input apparatus, a memory for storing a 3D structure, a memory for storing an application program, a memory for storing an amino acid sequence, a processor coupled to the memories, and a display unit.

Dahiyat et al. disclose inputting and storing a 3D structure (page 896, left column bottom); where the an application program provides at least one amino acid sequence compatible with the specified structure (page 897, left column); storing the obtained amino acid (page 897, right column); where a processor is coupled to the memories (page 902, left column, top); and a display unit (page 901, right column, 2nd full paragraph).

It would have been obvious to one of ordinary skill in the art to have an apparatus with an input, first memory, second memory, third memory, a processor, and a display unit to conduct the method of Dahiyat et al. Dahiyat et al. teaches using a computerized system for conducting their method. Thus, one of ordinary skill in the art using Dahiyat et al.'s method would be motivated to use a computer system that would include a display unit, input device, memories, and a processor as recited in the instant claims.

Withdrawn Rejections

3. Applicant's arguments and amendments, filed May 21, 2009, with respect to the rejection made under 35 U.S.C. §101 have been fully considered and are persuasive. This rejection has been withdrawn.

Allowable Subject Matter

Claims 1-18, 22, 24, and 25 are allowed.
